2007 Chevrolet HHR LS I really like the styling inside and out. I bought it used with over 200,000 miles on it and has 1 dash light but it is for emissions. It has a smooth ride. The turn signal indicator has to be held down or manually released but it works. The window motor in one of rear windows burnt out and is stuck open/down.

The 2007 Chevrolet HHR is a compact, 4-door wagon. The 2007 Chevrolet HHR (which is a carryover from 2006) comes in three trims; LS, LT1, and LT2. The HHR LS has a 2.2-L, I4, 149-hp engine; the HHR LT2 has a 2.4L, I4, 175-hp engine. Both of the HHR trims come with a 5-speed manual transmission with and optional 4-speed automatic.

While Canadians are proud of their healthcare system, the reality is that it is fragmented and disorganized. Instead of a pan-Canadian system, it is a "system of systems" - thirteen provincial and territorial systems and a federal system. As a result, Canadian

healthcare has not only become one of the costliest in the world, but is falling well behind many developed countries in terms of quality. Canadians increasingly realize that their healthcare system is no longer fiscally sustainable, yet change remains elusive. The standard claim is that Canada's multijurisdictional approach makes system-wide reform nearly impossible. *Toward a Healthcare Strategy for Canadians* disputes this reasoning, making the case for a comprehensive, system-wide, made-in-Canada healthcare strategy. It looks at the mechanics of change and suggests ways in which the various participants in the system - governments, healthcare professionals, the private sector, and patients - can work collaboratively to transform a second-rate system. Addressing critical issues of health human resources, electronic health records, integrated care, and pharmacare, *Toward a Healthcare Strategy for Canadians* shows how a system-wide strategic approach to this crucial policy area can make a difference in Canada's healthcare system in the future.

How society's undervaluing of life puts all of us at risk--and the groundbreaking economic measure that can fix it Like it or not, sometimes we need to put a monetary value on people's lives. In the past, government agencies used the financial "cost of death" to monetize the mortality risks of regulatory policies, but this method

vastly undervalued life. Pricing Lives tells the story of how the government came to adopt an altogether different approach--the value of a statistical life, or VSL--and persuasively shows how its more widespread use could create a safer and more equitable society for everyone. In the 1980s, W. Kip Viscusi used the method to demonstrate that the benefits of requiring businesses to label hazardous chemicals immensely outweighed the costs. VSL is the risk-reward trade-off that people make about their health when considering risky job choices. With it, Viscusi calculated how much more money workers would demand to take on hazardous jobs, boosting calculated benefits by an order of magnitude. His current estimate of the value of a statistical life is \$10 million. In this book, Viscusi provides a comprehensive look at all aspects of economic and policy efforts to price lives, including controversial topics such as whether older people's lives are worth less and richer people's lives are worth more. He explains why corporations need to abandon the misguided cost-of-death approach, how the courts can profit from increased application of VSL in assessing liability and setting damages, and how other countries consistently undervalue risks to life. Pricing Lives proposes sensible economic guideposts to foster more protective policies and greater levels of safety in the United States and throughout the world.

With increasing demands for evidence-based decision-making, the academic community must be ready to train researchers who can reduce the gap between health care research and practice. One program dedicated to promoting such training is the Canadian Health Services Research Foundation (CHSRF, now the Canadian Foundation for Healthcare Improvement) and Canadian Institutes for Health Research (CIHR) Chair Program. Participants of these programs were selected to develop innovative research programs that bridge this divide, as well as to mentor the next generation on building partnerships with organizations outside the university through applied research. The CHSRF/CIHR Chairs have come together in *Shaping Academia for the Public Good* to draw out valuable lessons learned throughout its first decade. It includes chapters on funding, knowledge transfer, policy frameworks, working with multiple stakeholders, and managing organizational settings, among other topics. *Shaping Academia for the Public Good* will be a helpful resource for those interested in the potential of new research approaches to improve our healthcare system.

The recent Chaoulli Supreme Court decision and health care proposals by Quebec and Alberta have led to renewed debate on how best to restructure the Canadian health care system. This volume offers a timely analysis of access and wait-times, alternative modes of health

care delivery, and funding methods from the perspective of evidence-based policy making.

Millennium development goals (MDGs) and sustainable development goals (SDGs) have significant implications for global development, in particular for African countries. This book seeks to assist Africa's policy makers and political leaders, MNCs and NGOs, plus its increasingly heterogeneous media landscape, to understand and better respond or negotiate the evolving development environment of the 21st century. In this collection of nuanced essays, the contributors interrogate the relationship between the MDGs and SDGs in key areas of African development to enhance our understanding and knowledge of the evolving nature of development. They address issues of governance, agriculture, south-south cooperation in a context of foreign aid, natural resource governance and sustainable development, export diversification and economic growth as well as emerging topics such as the internet of things or the sharing economy, climate change, conflict and non-traditional security. The varied, yet interlinked foci present a holistic overview of Africa's development aspirations, and ability to transform the SDGs' universal aspirations into local realities. This book will be of use to academics and students in Development Studies, Contemporary African Studies, Political Science,

An authoritative, state-of-the-art collection that brings together key experts to provide an overview of the field. This new paperback edition includes 3 new chapters on human resources and health, end-of-life care and complementary and alternative medicine as well as thorough updates to the introduction and conclusion.

Examining a shocking array of fraud, corruption, theft, and embezzlement cases, this vivid collection reveals the practice of detecting, investigating, prosecuting, defending, and resolving white-collar crimes. Each chapter is a case study of an illustrative criminal case and draws on extensive public records around both obscure and high-profile crimes of the powerful, such as money laundering, mortgage fraud, public corruption, securities fraud, environmental crimes, and Ponzi schemes. Organized around a consistent analytic framework, each case tells a unique story and provides an engaging introduction to these complex crimes, while also introducing students to the practical aspects of investigation and prosecution of white-collar offenses. Jennifer C. Noble's text takes students to the front lines of these vastly understudied crimes, preparing them for
