Bond Valuation: Example Problems

□ Cost of debt before and after tax  
Recall the bond valuation formula  
Replace  $V_B$  by the net price of the bond and solve for  $I/YR$   
 $I/YR = rd$  (cost of debt before tax)  
Net price = market price - flotation cost  
If we ignore flotation costs which are generally small, we can just use the actual market price to calculate  $rd$

The definitive source of information on all topics related to investment valuation tools and techniques. Valuation is at the heart of any investment decision, whether that decision is buy, sell or hold. But the pricing of many assets has become a more complex task in modern markets, especially after the recent financial crisis. In order to be successful at this endeavor, you must have a firm understanding of the proper valuation techniques. One valuation book stands out as withstanding the test of time among investors and students of financial markets, Aswath Damodaran's Investment Valuation. Now completely revised and updated to reflect changing market conditions, this third edition comprehensively introduces investment professionals
