This book provides a broad overview of what is needed to run hospitals and other health care facilities effectively and efficiently. All of the skills and tools required to achieve this aim are elucidated in the book, including business engineering and change management, strategic planning and the Balanced Scorecard, project management, integrative innovation management, social and ethical aspects of human

resource management, communication and conflict management, staff development and leadership. The guidance offered is exceptional and applicable in both developed and developing countries. Furthermore, the relevant theoretical background is outlined and instructive case reports are included. Each chapter finishes with a summary and five reflective questions. Excellence can only be achieved when health care professionals show in addition to their medical skills a high level of managerial competence. High performance in Hospital Management assists managers of health care providers as well as doctors and nurses to engage in the successful management of a health care facility.

Acute Rheumatic Fever and Rheumatic Heart Disease is a concise, yet comprehensive, clinical resource highlighting must-know information on rheumatic heart disease and acute rheumatic fever from a global perspective. Covering the major issues dominating the field, this practical resource presents sufficient detail for a deep and thorough understanding of the latest treatment options, potential complications, and disease management strategies to improve patient outcomes. Divided into four distinct sections for ease of navigation: Acute Rheumatic Fever, Rheumatic Heart Disease, Population-Based Strategies for Disease Control, and Acute and Emergency Presentations. International editors and chapter authors ensure a truly global perspective. Covers all clinical aspects, including epidemiology, pathophysiology, clinical features, diagnosis, management, and treatment. Includes key topics on population-based measures for disease control for effective primary, secondary, and tertiary prevention. Consolidates today's available information and guidance into a single, convenient resource.

The Dictionary of Southern African Place Names - now in its 4th edition - helps you sort your Komkhulu from your Kommetjie with the most comprehensive glossary of Southern African towns, villages, railway stations, mountains, rivers and beaches. The 9 000 short entries incorporate data from sources dating as far back as 1486, encapsulating the linguistic and cultural heritage of all the peoples of the subcontinent, past and present. In this highly readable book the expert authors take you on a fascinating journey of the highways and byways of Southern Africa. Whether you are a motorist, an adventurer or merely an armchair traveller, this book has a multitude of facts and details that will fascinate you. This is much more than a reference book - it gives an insight into what shapes a place and its people through our heroes, events, beliefs, values, fears and aspirations.

The Admission Test Series prepares students for entrance examinations into college, graduate and professional school as well as candidates for professional certification and licensure. The National Council Licensure Examination for Registered Nurses (NCLEX-RN) Passbook(R) prepares you by sharpening the skills and abilities necessary to succeed on your upcoming entrance exam. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: medical nursing; surgical nursing; obstetric nursing; pediatric nursing; psychiatric nursing; and more.

This second edition is a ground-breaking clinical text with a strong emphasis on rigorous evidence. Leaders in the field discuss best practice in the light of systematic reviews and randomised control trials, and how best to treat where the information is less clear. Case histories provide intriguing discussions on how to apply the evidence in real life situations. Evidence-based Cardiology also includes free access to the latest evidence, which is automatically posted on a companion website.

Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.

This book examines the historical and current state of health and the health of the African people, including the Arab North, impacted by such factors as geography and natural elements, cultural and colonial traditions, and competing biomedical and traditional systems. It also looks at technological advances, poverty and health disparities, utilization of resources, and international presence, as reflected by the work of the World Health Organization, and structural adjustments imposed by the IMF and the World Bank.

Health and healthcare in South Africa attempts to capture the essence of transformation and trends in the South African health sector. It offers, on the one hand, an overview of recent and current developments in the South African health care system, and on the other, of trends in the health status of the South African population. The book is a follow-up to the well-known Health care in South Africa - structure and dynamics (Van Rensburg, Fourie & Pretorius 1992), published just before the transition to a democratic society. The book retains a strong historical thread, but the focus is generally on the nature of the transformation process, gains made and failures encountered.
