Fresh out of prison, Richie Forman tries to settle back into his life in the Bay Area. By day, he works at a law firm dedicated to freeing innocent men from prison. An aging California vintner is determined to protect her empire from a hostile family takeover and the dark secrets that could destroy everything she loves. At age seventy-four, Assaria "Sari" LeBaron is still a force to be reckoned with. For decades, she has run the Baronet Vineyards, one of California's largest and most successful wine producers, maintaining sole control even after a suspicious accident left her permanently crippled. And now, in her golden years, the formidable Sari refuses to relinquish power to her own children, a decision that has only served to increase tensions among her already emotionally damaged family members. But Sari's ambitious son, Eric, is no longer willing to play a subservient role, and has begun working behind the scenes to take over the business, forming alliances within and outside the family in his effort to dethrone the unyielding matriarch. The most difficult fight of Sari LeBaron's long and eventful life has begun; a heartbreaking struggle that will pit loved one against loved one and expose long-hidden secrets that could destroy both Sari's business and her family. The LeBaron Secret is another riveting excursion into a world of privilege that Stephen Birmingham knows

intimately. It is a breathtaking tale of secrets and lies, shady double-dealings, family skeletons, and the inner turmoil of the fabulously wealthy as only the bestselling author of “Our Crowd” and The Auerbach Will could tell it.

Research on injuries is a high priority to inform public policy that reduces deaths, hospitalizations and associated costs. Principles for research design and analysis of injury incidence and severity are emphasized. Review of extant surveillance data reveals numerous flaws that must be changed to increase usefulness of the data. Research designs of studies of injury causation and evaluation of countermeasures are often inappropriate and mislead analytic and injury control efforts. Appendices to chapters illustrate research projects that influenced public policy affecting the reduction of motor vehicle fatalities per population by half in the U.S. The principles illustrated by these studies can be applied to other types of injury.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

The novel pits Ted Cogan, a forty-three-year-old surgeon and self-described womanizer, against Hank Madden, a handicapped veteran detective. From the outset it's not clear who is victim and who is victimizer, as the usually dispassionate Madden grapples with his long-suppressed prejudices and his obsession with bringing Ted Cogan to justice at any cost. It all leads up to the most stunning surprise ending since Scott Turow's Presumed Innocent.
