await them. Most teens understand this, and they want books, television shows, and films to reflect the reality of their world—the bad along with the good. In *They Hurt, They Scar, They Shoot, They Kill: Toxic Characters in Young Adult Fiction*, Joni Richards Bodart examines works of fiction that feature characters who threaten the psychological and physical well-being of teens and their friends and families. In this companion volume to *They Suck, They Bite, They Eat, They Kill*, the focus is on individuals who prey on the vulnerable: bullies, manipulators, torturers, sexual predators, and sadists. The novels and stories discussed in this volume feature adult criminals or predators who look for young people to ensnare; school personnel who interact with students

in harmful ways; teens who bully others in order to hide their own fears and weaknesses; and parents, siblings, and others who mistreat family members. Arranged in five sections that cover such topics as bullies, school shootings, and monsters at home, this volume analyzes the most important and well-written series and titles for teens. They Hurt, They Scar, They Shoot, They Kill will help parents, teachers, and other adults understand the value of these titles and the benefits of reading them, so they will be less likely to forbid them to their teens or challenge library collections for carrying them.

Although the “non-traditional” undergraduate student is in fact the new normal, the glut of

"Astin presents a completely new and expanded study of how students change and develop in college -- and reveals how colleges can enhance that development. Based on a study of more than 20,000 students, 25,000 faculty members, and 200 institutions, the book shows how academic programs, faculty, student peer groups, and other variables affect students' college experiences, and how these factors can shape students' personalities and behavior; values and beliefs; and academic, cognitive, and career development."--Page [4] of cover.
