Based on real-life experience and written by expert authors, the books in the Maintenance and Upgrades Manual series from Crowood will help owners develop the workshop skills needed for the maintenance and repair of their cars, and give guidance on possibilities for improvements and upgrades to performance. With step-by-step instructions and safety information throughout, this book is a valuable technical resource for owners of Mk1 and Mk2 Mazda MX-5s. Illustrated with over 700 colour photographs the book covers: tools and safety; weekly routine checks and twice-yearly checks, plus preparing for the MOT test; engine maintenance and tuning; gearbox and differential; brake maintenance and upgrades; uprating the suspension bushes and changing the springs and dampers; bodywork and hood maintenance and finally, what else can you do with an MX-5? Will be of interest to all amateur and professional motor mechanics and is superbly illustrated with over 700 colour photographs.

All 1.8 models, inc. Eunos, from 1994 (all pop-up headlight models). Phenomenally detailed, informative, helpful & easy to understand. Every detail of important repair & maintenance jobs is covered.

th This book contains papers accepted for presentation at the 4 International Conference on Computer Recognition Systems CORES'05, May 22-25, 2005, Rydzyna Castle (Poland), This conference is a continuation of a series of conferences on similar topics (KOSYR) organized each second year, since 1999, by the Chair of Systems and Computer Networks, Wroclaw University of Technology. An increasing interest to those conferences paid not only by home but also by foreign participants inspired the organizers to transform them into conferences of international range. Our expectations that the community of specialists in computer recognizing systems will find CORES'05 a proper form of maintaining the tradition of the former conferences have been confirmed by a large number of submitted papers. Alas, organizational constraints caused a necessity to narrow the acceptance criteria so that only 100 papers have been finally included into the conference program. The area covered by accepted papers is still very large and it shows how vivacious is scientific activity in the domain of computer recognition methods and systems. It contains various theoretical approaches to the recognition problem based on mathematical statistics, fuzzy sets, morphological methods, wavelets, syntactic methods, genetic algorithms, artificial neural networks, ontological models, etc. Most attention is still paid to visual objects recognition; however, acoustic, textual and other objects are also considered. Among application areas medical problems are in majority; recognition of faces, speech signals and textual information processing methods being also investigated.

The Total Car Care series continues to lead all other do-it-yourself automotive repair manuals. This series offers do-it-yourselfers of all levels TOTAL maintenance, service and repair information in an easy-to-use format. Each manual covers all makes format. The Chilton Total Car Care series continues to lead all other do-it-yourself automotive repair manuals. These manuals offer do-it-yourselfers of all levels TOTAL maintenance, service and repair information in an easy-to-use format. Each title covers all makes and models, unless otherwise indicated.

The devices described in " Advanced MOS-Gated Thyristor Concepts " are utilized in microelectronics production equipment, in power transmission equipment, and for very high power motor control in electric trains, steel-mills, etc. Advanced concepts that enable improving the performance of power thyristors are discussed here, along with devices with blocking voltage capabilities of 5,000-V, 10,000-V and 15,000-V. Throughout the book, analytical models are generated to allow a simple analysis of the structures and to obtain insight into the underlying physics. The results of two-dimensional simulations are provided to corroborate the analytical models and give greater insight into the device operation.
