A college text for a one- or two-term first course in digital logic design at about the sophomore or junior level. It covers the basics of switching theory and logic design necessary to analyze and design combinational and sequential logic circuits at switch, gate, and register (or register-transfer

An understandable introduction to the theory of structural stability, useful for a wide variety of engineering disciplines, including mechanical, civil and aerospace.

From the USA Today Bestselling author of The Sword of the Templars and The Aztec Heresy Some secrets are too great to bear... Retired Army Ranger Lt. Col. John Holliday has reluctantly settled into his teaching position at West Point when young Israeli archaeologist Rafi Wanounou comes to him with desperate news. Holliday's niece—and Rafi's fiancé—Peggy has been kidnapped. Holliday sets out with Rafi to find the only family he has left. But their search for Peggy will lead them to a trail of clues that spans across the globe, and into the heart of a conspiracy involving an ancient Egyptian legend and the darkest secrets of the Order of Templar Knights. Secrets that, once known, cannot be survived...

THIS CASEBOOK contains a selection of U. S. Court of Appeals decisions that analyze and discuss issues stemming from election law. Volume 1 of the casebook covers the District of Columbia Circuit and the First through the Fifth Circuit Court of Appeals. Any restrictions on access to the ballot necessarily "implicate substantial voting, associational[,] and expressive rights protected by the First and Fourteenth Amendments." McLaughlin v. N.C. Bd. of Elections, 65 F.3d 1215, 1221 (4th Cir. 1995). However, states have the power to regulate the time, place, and manner of their own elections, see U.S. Const. art. 1, § 4, cl. 1, to ensure that "some sort of order, rather than chaos, ... accompan[ies] the democratic processes," Burdick, 504 U.S. at 433, 112 S.Ct. 2059 (quoting Storer v. Brown, 415 U.S. 724, 730, 94 S.Ct. 1274, 39 L.Ed.2d 714 (1974)). Accordingly, in evaluating a challenge to a ballot-access law, courts must weigh the character and magnitude of the asserted injury to the rights protected by the First and Fourteenth Amendments that the plaintiff seeks to vindicate against the precise interests put forward by the State as justifications for the burden imposed by its rule, taking into consideration the extent to which those interests make it necessary to burden the plaintiff's rights. Id. at 434, 112 S.Ct. 2059 (citation omitted). When election laws "impose a severe burden on ballot access," those laws "are subject to strict scrutiny," and will be upheld only if the laws are "narrowly drawn" to support a compelling state interest. Pisano v. Strach, 743 F.3d 927, 933 (4th Cir. 2014) (citation omitted). Election laws that impose only a "modest" burden will be upheld if the state can "articulate" its "important regulatory interests." Libertarian Party of Va. v. Alcorn, 826 F.3d 708, 716, 719 (4th Cir. 2016) (citations omitted). A "state's important regulatory interests are generally sufficient to justify reasonable, nondiscriminatory restrictions." Anderson v. Celebrezze, 460 U.S. 780, 788, 103 S.Ct. 1564, 75 L.Ed.2d 547 (1983). Buscemi v. Bell, 964 F. 3d 252 (4th Cir. 2020)

This new editoin has been updated in line with the changes to the motorcycle theory test revision bank. The theory test questions now have just one correct option out of four, making the questions easier to understand and reflecting the real test.
