Imaging India, Imaging Japan: A Chronicle of Reflections on Mutual Literature provides a comprehensive history of academic exchange between India & Japan in the field of mutual literature. It covers the status of Indian literature studies in Japan and Japanese literature studies in India. This volume is a product of intensive consultations and dialogue between writers, scholars, researchers and literary translators of both the countries. The book addresses the question of images popular and literary, in Indian and Japanese literature. It strives to explore the nature of cultural and spiritual interactions between India and Japan. Specific case studies have been organized in order to trace the roots of literary influences as well as the main currents in our contemporary literature keeping in view the possibility of learning from the literary perspectives of each other. The book also carries an updated bibliography on mutual literature. A thoroughly researched collaborative work, this volume is first of its kind in the history of international literary exchange that contains contributions from the doyens of Indian and Japanese literature. The book would be of considerable interest to a wide cross-section of readers such as writers, literary critics, researchers, translators, teachers and students of Japan and India.

This volume discusses the past, present and future perspectives of literature in Japan, China and South Korea and its interface with India. Since this being a largely unexplored area, an attempt has been made to present a true picture of the literature and cultural milieu of the East Asian countries to the readers through well researched, thought-provoking and enlightening papers contributed by eminent scholars from India, Japan, China and Korea. It is a historical fact that India maintains strong cultural ties with East Asian countries directly or indirectly through religion and culture since ancient times. This cultural bond has become all the more significant and meaningful in this age of information technology and globalization. In this context, literature has a great role to play. To be precise, it is only through literature that this existing bond of cultural affinity among India and East Asian countries could be nurtured and strengthened. This book gives a vivid picture of the state of the past and present literary trends in Japan, China and South Korea, the influence of Indian literary trends and thought on their literatures, and the general perception and assimilation of East Asian literatures in India. This book would be a unique and comprehensive reference material for teachers, researchers, students, writers, and literary critics of Indian and East Asian literatures.

Papers presented at the three day International Conference on "Changing Global Profile of Japanese Studies : Trends and Prospects", held at New Delhi during 6-8 March 2009.

Taking a long view, and a wide perspective, this book by Japan's leading scholars on Asia and Eurasia provides a comprehensive and systematic comparison of the three greatest powers in the region and assesses how far the recent growth trajectories of these countries are sustainable in the long run. The book demonstrates the huge impact on the region of these countries. It examines the population, resource and economic basis for the countries' rise, considers political, social and cultural factors, and sets recent developments in a long historical context. Throughout, the different development paths of the three countries are compared and contrasted, and the new models for the future of the world order which they represent are analysed.

Re-Imaging Japanese Women takes a revealing look at women whose voices have only recently begun to be heard in Japanese society: politicians, practitioners of traditional arts, writers, radicals, wives, mothers, bar hostesses, department store and blue-collar workers. This unique collection of essays gives a broad, interdisciplinary view of contemporary Japanese women while challenging readers to see the development of Japanese women's lives against the backdrop of domestic and global change. These essays provide a "second generation" analysis of roles, issues and social change. The collection brings up to date the work begun in Gail Lee Bernstein's *Recreating Japanese Women, 1600-1945* (California, 1991), exploring disparities between the current range of images of Japanese women and the reality behind the choices women make.

Focusing on one landmark catastrophic event in the history of an emerging modern nation|the Great Kanto Earthquake that devastated Tokyo and surrounding areas in 1923|this fascinating volume examines the history of the visual production of the disaster. The Kanto earthquake triggered cultural responses that ran the gamut from voyeuristic and macabre thrill to the romantic sublime, media spectacle to sacred space, mournful commemoration to emancipatory euphoria, and national solidarity to racist vigilantism and sociopolitical critique. Looking at photography, cinema, painting, postcards, sketching, urban planning, and even scientific visualizations, Weisenfeld demonstrates how visual culture has powerfully mediated the evolving historical understanding of this major national disaster, ultimately enfolding mourning and memory into modernization.
