The carburetor might be clogged. A clogged carburetor is most commonly caused by leaving fuel in the engine for a long period of time. Over time, some of the ingredients in the fuel may evaporate, leaving behind a thicker, stickier substance. This sticky fuel can clog up the carburetor and prevent the engine from starting.

~~Kohler Engine No Start File Type~~

Step 1. Remove the cowling (the outer housing) from around the engine, loosening whatever screws or bolts are holding it in place. With many lawnmowers, this will be enough to expose the flywheel and ignition coil; with other mowers, you may need to remove some other shields or parts before you see the coil.
