Solution to Linear Algebra Done Wrong Exercise 1.2.6. Anavim. December 31, 2019. Linear Algebra Done Wrong. 0 Comments. Is it possible that vectors v_1, v_2, v_3 are linearly dependent, but the vectors $w_1 = v_1 + v_2, w_2 = v_2 + v_3, w_3 = v_3 + v_1$ are linearly independent? Solution: It is impossible. Let us argue it as follows. Since v_1, v_2, v_3 are linearly dependent, by Proposition 2.6, we can assume without loss of generality that $v_3 = x v_1 + y v_2$ for some scalars x and y .

The book's title suggests that it is not the typical approach to linear algebra even among those books that are more theoretical. For example, the concept of a basis is treated as more fundamental than the concept of linear independence, and linear transformations are introduced before solving systems of linear equations.
