Logic Programming and Nonmonotonic Reasoning: 13th ...

A theory of nonmonotonic reasoning will be described in more detail, together with its implementation in a logic program, as suggested by Nute<sup>9</sup>. The theory generalizes Nute's idea, implemented in a logic program, that it is possible to take into account this distinction between rules.

Logic Programming and Nonmonotonic Reasoning on Apple Books

A non-monotonic logic is a formal logic whose consequence relation is not monotonic. In other words, non-monotonic logics are devised to capture and represent defeasible inferences, i.e., a kind of inference in which reasoners draw

# Read Free Logic Programming And Nonmonotonic Reasoning 13th

tentative conclusions, enabling reasoners to retract their conclusion based on further evidence. Most studied formal logics have a monotonic consequence relation, meaning that adding a formula to a theory never produces a reduction of its set of consequences. Intuitiv

Logic Programming and Nonmonotonic Reasoning - 10th ...  
Non-monotonic Logic. The term “non-monotonic logic” (in  
short, NML) covers a family of formal frameworks devised to  
capture and represent defeasible inference. Reasoners draw  
conclusions defeasibly when they reserve the right to retract  
them in the light of further information.
