Presents a collection of fold-and-color menus that reinforce real-life math skills and problem-solving strategies.

Assessing math concepts is a continuum of assessments that focus on important core concepts and related "critical learning phases" that must be in place for children to understand and be successful in mathematics. This series is based on the premise that teachers can provide more effective instruction when they are aware of the essential steps that children move through in developing an understanding of foundational mathematical ideas. The assessment tools presented here provide teachers with the information they need to determine precisely what children need to learn. Students progress confidently when teachers are able to provide appropriately challenging learning experiences. - Back cover

Every day, your child encounters math in many different situations. The activities in Creative Kids Math make learning math fun while also challenging your child to use math skills in different subject areas. The activities include stories, games, science experiments, and crafts! In Creative Kids Math, your first grader will:

- ¥ Add and subtract 0 to 20.
- ¥ Work with measurement and shapes.
- ¥ Graph and chart scientific observations.
- ¥ Solve math codes to unlock interesting science facts.
- ¥ Create art using shapes and halves and wholes.

Describes the philosophy of the Daily 5 teaching structure and includes a collection of literacy tasks for students to complete daily.
