*Microsoft .NET: Architecting  
Applications for the Enterprise*

Build redundancy into your application,  
to avoid having single points of failure.  
Minimize coordination. Minimize  
coordination between application  
services to achieve scalability. Design  
to scale out. Design your application  
so that it can scale horizontally, adding  
or removing new instances as demand  
requires. Partition around limits. Use  
partitioning to work around database,  
network, and compute limits.
