Common Nissan Juke Problems » AutoGuide.com News

1. Transmission Fluid Low. If your Juke is too low on transmission fluid, it'll will no longer be able to transfer power to the rear wheels. The power goes to the torque converter, and that's the end of the line. You should check the transmission fluid immediately. This is the number one cause of not accelerating but the RPM's Go up.

Common Reasons Your Nissan Juke Wont Accelerate ...

Please take a minute to read this letter. Nissan Juke & Qashqai CVT Automatic Transmissions are suffering with 'stalling of the engine' and a noise due to a collapse of an internal bearing in the transmission which causes the blocking of an oil feed hole and damage to some internal components. To date parts to rectify this problem are not available from Nissan, for the customers the only option was a replacement transmission- this is very costly and eighteen months ago a customer of our ...

Nissan CVT Automatic Transmission problems on Juke ...

Now if it does this on a cool transmission, like sitting over night or parked for more than 4 hours, then you have a more serious problem. Take it to the dealership to have them inspect the fluid level and condition, and have them check for codes.
