OpenAMIP is an IP based protocol that facilitates the exchange of information between an Antenna Controller Unit and a satellite router. It allows the router to command the antenna and enables the use of Automatic Beam Switching (ABS), which transfers connectivity from one satellite beam to the next as a vessel passes through multiple footprints.

OpenAMIP Solution Overview

On controllers that have the OpenAMIP software option, there will be an additional dropdown to allow the user to configure the modem listen port. The default modem listen port is shown in the image below. The modem will then need to be configured to talk to the ACU at the ACU

I want to control an iDirect modem (7000 infinity) through openAMIP protocol over UDP. I've modified the options file as it is shown in the openAMIP implementation document, but it does not seem to work, and I don't know if it is possible to configure the openAMIP protocol on the iDirect modem by using iSite.
