The International Bank for  
Reconstruction and Development

# Access Free Reconstructing

(IBRD) is an international financial institution, established in 1944 and headquartered in Washington, D.C., United States, that is the lending arm of World Bank Group. The IBRD offers loans to middle-income developing countries. The IBRD is the first of five member institutions that compose the World Bank Group.

The book provides a systematic assessment of the evolution of development theory, its relationship to orthodox social science analysis and the liberal pluralistic orthodoxy that now dominates the mainstream approach to international development, showing how we

can transcend its failure to address some key problems of late and uneven development

Thinking on development informs and inspires the actions of people, organizations, and states in their continuous effort to invent a better world. This volume examines the ideas behind development: their origins, how they have changed and spread over time, and how they may evolve over the coming decades. It also examines how the real-life experiences of different countries and organizations have been inspired by, and contributed to, thinking on development. The extent to which development 'works' depends in part on particular local, historical, or

# Access Free Reconstructing

Institutional contexts. General policy prescriptions fail when the necessary conditions that make them work are either absent, ignored, or poorly understood. There is a need to grasp how people understand their own development experience. If the countries of the world are varied in every way, from their initial conditions to the degree of their openness to outside money and influence, and success is not centred in any one group, it stands to reason that there cannot be a single recipe for development. Each chapter provides an analytical survey of thinking about development that highlights debates and takes into account critical perspectives. It includes contributions from

# Access Free Reconstructing

Scholars and practitioners from the global North and the global South, spanning at least two generations and multiple disciplines. It will be a key reference on the concepts and theories of development - their origins, evolution, and trajectories - and act as a resource for scholars, graduate students, and practitioners.

This book is an introduction to the wide-ranging topic of non-governmental organizations (NGOs) and development, combining a critical overview of the main research literature with a set of up-to-date theoretical and practical insights drawn from experience in Asia, Europe, Africa and elsewhere. The revised

# Access Free Reconstructing

second edition highlights the continuing importance of NGOs in development, while fully engaging with the criticisms that their increased profile now attracts. It considers issues such as securitization, changing technologies, and recent concerns about safeguarding as well as going into more detail around topics such as market-based development and social enterprise. The diversity of NGOs and their roles is discussed against the broader historical background of struggles for social justice in different societies, as well as within the shifting ideological contexts of neoliberalism and populism. Using a broad range of short case studies of both successful and

# Access Free Reconstructing

Development Theory, the authors analyze how interest in NGOs has both reflected and informed wider theoretical trends and debates within development studies. The book argues that NGOs are central to both development theory and practice and are likely to remain important actors for many years to come. This critical overview will be useful to students of development studies at undergraduate and master's levels in fields and disciplines as diverse as International Development Studies, International Relations, Geography, Anthropology, Global Studies, Politics and International Studies, as well as general readers and practitioners.

# Access Free Reconstructing

This book takes a historical approach to analyse ideologies, policy approaches and development systems that have constructed the paradigm of international social development. It aims to review the social construction of "development" by tracing the historical dynamics of the modern ideologies and political economy of industrialization, colonization, the Cold War, and globalisation; to examine the process of reconstruction of development as "social development" based on alternate ideologies and alternate policy approaches and review the roles played by the development systems; and to trace the history of social policy approaches from welfare to rights-based, universal,

# Access Free Reconstructing

Development and preventative social policies for social development, and identify the roles played by non-government organizations and the social work profession.

Non-Governmental Development Organizations have seen turbulent times over the decades; however, recent years have seen them grow to occupy high-profile positions in the fight against poverty. They are now seen as an important element of 'civil society', a concept that has been given increasing importance by global policy makers. This book has evolved during the course of that period to be a prime resource for those working (or wishing to work) with and for

# Access Free Reconstructing

NGOs. The third edition of Non-Governmental Organizations, Management and Development is fully updated and thoroughly reorganized, covering key issues including, but not limited to, debates on the changing global context of international development and the changing concepts and practices used by NGOs. The interdisciplinary approach employed by David Lewis results in an impressive text that draws upon current research in non-profit management, development management, public management and management theory, exploring the activities, relationships and internal structure of the NGO. This book remains the first and only

# Access Free Reconstructing

Development and academically grounded guide to the issues facing international development NGOs as they operate in increasingly complex and challenging conditions around the world. It is the perfect resource for students undertaking studies of NGOs and the non-profit sector, in addition to being an excellent resource for development studies students more generally.

Social work is a profession that is increasingly involved with issues which have a global dimension. This Handbook tackles the global/local aspect of social work in its various forms and interrogates the key concerns that societies are facing through

# Access Free Reconstructing

Development Theory  
International Inequality  
Institutional Reform And  
Social Emancipation

an international lens. The contributors show that, with an appreciation of commonalities and differences, local practices and appropriate forms of international activity can be better developed. Areas covered include:

- Analysis of 'International social work' -
- Globalisation and indigenisation -
- Social justice and human rights -
- Poverty and livelihoods -
- Ecological issues -
- Migration -
- Education, theory, research and practice -
- Social work in different settings -
- Religion and spirituality -
- Responses to disasters and conflicts -
- Life course perspectives -
- Regional perspectives -
- Future directions

With a truly international range of contributions, the Handbook

# Access Free Reconstructing

Incorporates perspectives from Asia, Africa, Europe, Australasia, the Middle East and the Americas. It will be an invaluable resource for undergraduates, postgraduates, researchers and academics working in the fields of social work, social welfare, human services, and community development worldwide, as well as service providers and policy makers in the international arena.

This book makes critical contributions to the understanding of African international relations using topics such as; polar politics and regionalism in Africa, refugees and African politics, regionalism in Africa; Evaluating Economic Progress, African Women in

Development and Intra-African Trade: Political Economic Perspectives. Others are Changing Security: Global Health, Militarization of Regimes, OAU- Pan Africanism; AU – Missing Ideology, Foreign Policy in Africa: Issues, Dynamics and Challenges, Ideology and Contemporary Political Thinking in Africa, Paradoxes of Hedging in Regional Security Complexes of Africa, The Rise of China in Africa's Conflict - Cooperation, and Landlocked Countries Foreign Policy and Cross Border Security.

This book explores Nigeria's progress towards achieving the Sustainable Development Goals, presenting key country-specific lessons, as well as providing

# Access Free Reconstructing

Innovative solutions and practices which are transferrable to other emerging economies. Despite all of Nigeria's potential, and substantial oil revenues, poverty remains widespread and the country faces many challenges. The contributors to this book provide comparative historical and contemporary analysis of the main challenges for achieving progress in the SDGs, and make recommendations for the most effective ways of developing, adopting, disseminating and scaling them. Starting with the conceptualisation and evolution of the SDGs, the book goes on to consider the goal on ending poverty, and the urgent need to combat climate change and its impacts. The book also reflects on

# Access Free Reconstructing

Development Theory and taxation, and the cultural and societal dimensions of the SDGs, including education, gender, and the role of the church. Overall, the book focuses on knowledge/implementation gaps and the role of collaborative partnerships and disruptive technologies in implementing the framework in general. This book will be of interest to scholars, policy makers and practitioners of sustainable development and African studies, as well as those with a particular interest in Nigeria.

In *Moral Pressure for Responsible Globalization*, Steiner offers an account of religious diplomacy with the G8/G7 and G20 to evoke

# Access Free Reconstructing

new possibilities to steer globalization in more equitable and sustainable directions in the Age of the Anthropocene.

## Social Emancipation

Experts explore current theory and practice in the application of digitally enabled open networked social models to international development. The emergence of open networked models made possible by digital technology has the potential to transform international development. Open network structures allow people to come together to share information, organize, and collaborate. Open development harnesses this power, to create new organizational forms and improve people's lives; it is not only an agenda for research and

# Access Free Reconstructing

practice but also a statement about how to approach international development. In this volume, experts explore a variety of applications of openness, addressing challenges as well as opportunities. Open development requires new theoretical tools that focus on real world problems, consider a variety of solutions, and recognize the complexity of local contexts. After exploring the new theoretical terrain, the book describes a range of cases in which open models address such specific development issues as biotechnology research, improving education, and access to scholarly publications. Contributors then examine tensions between open models and existing structures, including

Social Emancipation

struggles over privacy, intellectual property, and implementation. Finally, contributors offer broader conceptual perspectives, considering processes of social construction, knowledge management, and the role of individual intent in the development and outcomes of social models. Contributors Carla Bonina, Ineke Buskens, Leslie Chan, Abdallah Daar, Jeremy de Beer, Mark Graham, Eve Gray, Anita Gurumurthy, Havard Haarstad, Blane Harvey, Myra Khan, Melissa Loudon, Aaron K. Martin, Hassan Masum, Chidi Oguamanam, Katherine M. A. Reilly, Ulrike Rivett, Karl Schroeder, Parminder Jeet Singh, Matthew L. Smith, Marshall S.
