Ammonia holds great promise as a carbon-neutral liquid fuel for storing intermittent renewable energy sources and power generation due to its high energy density and hydrogen content. Photo-Electrochemical Ammonia Synthesis:

Nanocatalyst Discovery, Reactor Design, and Advanced Spectroscopy covers the synthesis of novel hybrid plasmonic nanomaterials and their application in photo-electrochemical systems to convert low energy molecules to high value-added molecules and looks specifically at photo-electrochemical nitrogen reduction reaction (NRR) for ammonia synthesis as an attractive alternative to the long-lasting thermochemical process. Provides an integrated scientific framework, combining materials chemistry, photo-electrochemistry, and spectroscopy to overcome the challenges associated with renewable energy storage and transport. Reviews materials chemistry for the synthesis of a range of heterogeneous (photo) electrocatalysts including plasmonic and hybrid plasmonic-semiconductor nanostructures for selective and efficient conversion of N_2 to NH_3 . Covers novel reactor design to study the redox processes in the photo-electrochemical energy conversion system and to benchmark nanocatalysts' selectivity and activity toward NRR. Discusses the use of advanced spectroscopic techniques to probe the reaction mechanism for ammonia synthesis. Offers techno-economic analysis and presents performance targets for the scale-up and commercialization of electrochemical ammonia synthesis. This book is of value to researchers, advanced students, and industry professionals working in sustainable energy storage and conversion across the disciplines of Chemical Engineering, Mechanical Engineering, Materials Science and Engineering, Environmental Engineering, and related areas.

Satire at its best! In this indelible and deeply moving portrait of our time, two young people, Beckman and Malany set out on an odyssey to find meaning and reality in the artistic life, and in doing so unleash a barrage of humorous, unintended consequences. Beckman and Malany's journey reflects the allegorical evolution of humanity from its primal state, represented by Beckman's dismal life as a dishwasher to the crude, medieval development of manking in a pool hall, and then to the false but erudite veneer of sophistication of the academic world. The world these protagonists live in is a world without love. It has every other variety of drive and emotion, but not love. Do they know it? Not yet. And they won't until they figure out why no birds sing here. Meier's writing is precise and detailed, whether the situation he describes is clear or ambiguous. Fans of Franzen and Salinger will find Meier to be another sharp, provocative writer of our time.

Mainliners: Main Dish Recipes is the eighth in a series of cookbooks taken from the massive, original, out of print Nature's Nook cookbook, a great cookbook, we wrote many years ago when we owned Nature's Nook vegetarian restaurant and yoga studio in Boardman, Ohio. It contained all the recipes we used every day in the restaurant, plus it had tons of other natural cooking tips, techniques, and nutritional information we learned over the years. This cookbook, Mainliners: Main Dish Recipes, contains ninety recipes for the vegetarian and plant-based main dishes we served. It is full of tasty, healthy, alternative main dishes that provide

good nutrition and are easy to prepare, like Potatoes Delmonico, Kontomire Stew, and Vegetable Sunflower Goulash, to name just a few. Please look for more cookbooks in the Nature's Nook series.

He lives by the law. She's running for her life. After forensic accountant Beth Greenwood uncovers a money-laundering scheme tying her company to the organization that murdered her mentor, she knows she needs to go into hiding. With ruthless killers in pursuit, she's forced to rely on homeland security agent Corbin Ross's protection—even as his investigation suggests Beth is complicit in embezzlement. Can their uneasy alliance develop into something deeper—and keep them alive?

A school counselor places a worn-out shoebox on table near substitute teacher, Mrs. M. She ends up adopting the Red-eared Slider turtle inside. This book is based on the author's own experiences of caring for Nelly the turtle as a pet.
