Ten short stories in which the lives of young people in different circumstances are changed by their encounters with books.

"As a bookseller, I loved Shelf Life for the chance to peer behind the curtain of Diwan, Nadia Wassef's Egyptian bookstore—the way that the personal is inextricable from the professional, the way that failure and success are often lovers, the relationship between neighborhoods and books and life. Nadia's story is for every business owner who has ever jumped without a net, and for every reader who has found solace in the aisles of a bookstore." —Emma Straub, author of *All Adults Here*

"Shelf Life is such a unique memoir about career, life, love, friendship, motherhood, and the impossibility of succeeding at all of them at the same time. It is the story of Diwan, the first modern bookstore in Cairo, which was opened by three women, one of whom penned this book. As a bookstore owner I found this fascinating. As a reader I found it fascinating. Blunt, honest, funny." —Jenny Lawson, author of *Broken (in the best possible way)*

The warm and winning story of opening a modern bookstore where there were none, *Shelf Life: Chronicles of a Cairo Bookseller* recounts Nadia Wassef's troubles and triumphs as a founder and manager of Cairo-based Diwan. The streets of Cairo make strange music. The echoing calls to prayer; the raging insults hurled between drivers; the steady crescendo of horns honking; the shouts of street vendors; the television sets and radios blaring from every sidewalk. Nadia Wassef knows this song by heart. In 2002, with her sister, Hind, and their friend, Nihal, she founded Diwan, a fiercely independent bookstore. They were three young women with no business degrees, no formal training, and nothing to lose. At the time, nothing like Diwan existed in Egypt. Culture was languishing under government mismanagement, and books were considered a luxury, not a necessity. Ten years later, Diwan had become a rousing success, with ten locations, 150 employees, and a fervent fan base. Frank, fresh, and very funny, Nadia Wassef's memoir tells the story of this journey. Its eclectic cast of characters features Diwan's impassioned regulars, like the demanding Dr. Medhat; Samir, the driver with CEO aspirations; meditative and mythical Nihal; silent but deadly Hind; dictatorial and exacting Nadia, a self-proclaimed bitch to work with—and the many people, mostly men, who said Diwan would never work. *Shelf Life* is a portrait of a country hurtling toward revolution, a feminist rallying cry, and an unapologetic crash course in running a business under the law of entropy. Above all, it is a celebration of the power of words to bring us home.

A nuanced, feminist, and deeply personal take on beauty culture and YouTube consumerism, in the tradition of Maggie Nelson's *Bluets*. As Daphné B. obsessively watches YouTube makeup tutorials and haunts Sephora's website, she's increasingly troubled by the ways in which this obsession contradicts her anti-capitalist, intersectional feminist politics. In a looks-obsessed, selfie-covered present where influencers make the world go round, she brings us a breath of fresh air: an anti-capitalist look at a supremely capitalist industry, an

intersectional feminist look at a practice many consider misogynist. Blending together the confessional, the poetic, and the essayistic, *Made-Up* is a lyric meditation on an industry in full bloom. *Made-Up* explores the complicated world of makeup, from how it's made to how we wear it, talking about gender, identity, capitalism, and pop culture in the process. Makeup doesn't get a lot of serious attention; it's often derided as shallow. But Daphné proves that it's worth looking at a little more in-depth. The original French-language edition was a cult hit in Quebec. Translated from the French by Alex Manley—like Daphné, a Montreal poet and essayist—the text crackles with life, retaining the flair and verve of the original, and ensuring that a book on beauty is no less beautiful than its subject matter.

Suzanne Shea has always loved a good book—and she's written five of them, all acclaimed. In the course of her ten-year career, she's done a good bit of touring, including readings and drop-ins at literally hundreds of bookstores. She never visited one that wasn't memorable. Two years ago, while recovering from radiation therapy, Shea heard from a friend who was looking for help at her bookstore. Shea volunteered, seeing it as nothing more than a way to get out of her pajamas and back into the world. But over next twelve months, from St. Patrick's Day through Poetry Month, graduation/Father's Day/summer reading/Christmas and back again to those shamrock displays, Shea lived and breathed books in a place she says sells 'ideas, stories, encouragement, answers, solace, validation, the basic ammunition for daily life.' Her work was briefly interrupted by an author tour that took her to other great bookstores. Descriptions of these and her memories of book-lined rooms reaching all the way back to childhood visits to the Bookmobile are scattered throughout this charming, humorous, and engrossing account of reading and rejuvenation. For anyone who loves books, and especially for anyone who has fallen under the spell of a special bookstore, *Shelf Life* will be required reading.

Shelf-life restrictions play an important role in the tactical planning for the Fast Moving Consumer Goods (FMCG) industry. Ignoring shelf-life limitations could lead to unnecessary waste of products and missed sales. We present 3 methods of implementing shelf-life limitations in an LP planning model. A direct method, where the number of weeks since a product was produced is tracked, an indirect method, which ensures that the total shelf-life of a product is not exceeded, and a hybrid method that models the shelf-life on the first storage stage directly and on the second stage indirectly. With the direct method solutions with the lowest costs were obtained. However, with

the hybrid method solutions with a cost increase of only 0.01-0.03% could be obtained in about 1/5th of the computational time. With the indirect method solutions could be obtained in 1/50th of the time of the direct method. However, the costs increased by up to 13.3%.

The latest edition has been expanded to include new chapters on HACCP, preservation technology and shelf life, and minimally processed, ready-to-eat ambient-stable meat products.
