Examines the many reasons and motivations for the destruction of books throughout history, citing specific acts from the smashing of ancient Sumerian tablets to the looting of libraries in post-war Iraq.

Libraries preserve the knowledge and ideas on which rights depend; no wonder they are so often attacked. Richard Ovenden tells the history of this deliberate destruction of knowledge--from library burnings to digital attacks and contemporary underfunding--and makes a passionate plea for the importance of these threatened institutions.

Michael Kulikowski traces two hundred years of Roman history during which the Empire became ungovernable and succumbed to turbulence and change. A sweeping political narrative, The Tragedy of Empire tells the story of the Western Roman Empire’s downfall, even as the Eastern Empire remained politically strong and culturally vibrant.

The establishment of a Middle East zone free of nuclear weapons, a concept more recently broadened to cover all weapons of mass destruction (WMD), has been before the international community for decades. In this book, two experts from the region explore why the matter remains unresolved, and outline a comprehensive yet achievable roadmap to a Middle East free of WMD. Weapons of mass destruction pose an existential threat to global peace and security. But nowhere is it more urgent to stem their spread than in the Middle East, a region fraught with mistrust and instability. Accounting for these geopolitical realities, including the ongoing talks to curb Iran’s nuclear program, the authors present a practical and innovative strategy to a Middle East free of weapons of mass destructions (WMD). They outline a phased approach toward disarmament in the region, prescribing confidence-building measures and verification tools to create trust among the region’s governments. Their vision also sees the realization of a WMD-free zone within a broader regional agenda for security and cooperation to advance socioeconomic and political progress. This book will be of great interest to students and scholars of international relations, politics and security studies in the Middle East.

A world-renowned economist offers cogent and powerful reflections on one of the great avoidable economic catastrophes of the modern era. The economic crisis in Greece is a potential international disaster and one of the most extraordinary monetary and political dramas of our time. The financial woes of this relatively small European nation threaten the long-term viability of the Euro while exposing the flaws in the ideal of continental unity. "Solutions" proposed by Europe's combined leadership have sparked a war of prideful words and stubborn one-upmanship, and they are certain to fail, according to renowned economist James K. Galbraith, because they are designed for failure. It is this hypocrisy that prompted former finance minister Yanis Varoufakis, when Galbraith arrived in Athens as an adviser, to greet him with the words "Welcome to the poisoned chalice." In this fascinating, insightful, and thought-provoking collection of essays--which includes letters and private memos to both American and Greek officials, as well as other previously unpublished material--Galbraith examines the crisis, its causes, its course, and its meaning, as well as the viability of the austerity program imposed on the Greek citizenry. It is a trenchant, deeply felt commentary on what the author calls "economic policy as moral abomination," and an eye-opening analysis of a contemporary Greek tragedy much greater than the tiny economy of the nation itself.

The term 'urbicide' became popular during the 1992-95 Bosnian war as a way of referring to widespread and deliberate destruction of the urban environment. Coined by writers on urban development in America, urbicide captures the sense that the widespread and deliberate destruction of buildings is a distinct form of violence. Using Martin Heidegger's notion of space and Jean-Luc Nancy's idea of community, Martin Coward outlines a theoretical understanding of the urban condition at stake in such violence. He contends that buildings are targeted because they make possible a plural public space that is contrary to the political aims of ethnic-nationalist regimes. Illustrated with reference to several post-Cold War conflicts – including Bosnia, Chechnya and Israel/Palestine – this book is the first comprehensive analysis of organised violence against urban environments. It offers an original perspective to those seeking to better understand urbanity, political violence and the politics of exclusion.

In the early hours of November 10, 1938, Nazi storm troopers and Hitler Youth rampaged through Jewish neighborhoods across Germany, leaving behind them a horrifying trail of terror and destruction. More than a thousand synagogues and many thousands of Jewish shops were destroyed, while thirty thousand Jews were rounded up and sent to concentration camps. Kristallnacht—the Night of Broken Glass—was a decisive stage in the systematic eradication of a people who traced their origins in Germany to Roman times and was a sinister forewarning of the Holocaust. With rare insight and acumen, Martin Gilbert examines this night and day of terror, presenting readers with a meticulously researched, masterfully written, and eye-opening study of one of the darkest chapters in human history.

Conflicts, wars, catastrophic climate change and poverty are leading to our destruction. We are not evil people. We just "do not know what we do." To change the course of destruction we need to nurture in each one of us a sense of interconnectedness of life on this planet. We need to understand the position of a person we have differences with. Instead of focusing on what they say or how they behave, we need to explore where they are coming from, their frame of reference, the facts they use, the impact of history, the influence of their vested interest and the context of the system they are a part of. We need to learn to listen to each other with loving investment and compassionate exploration. By detaching from our programming and preconceived positions, we can develop a deeper understanding of each other that brings us closer. This book explores these issues by reviewing catastrophic events in human history, such as the Partition of India, Hitler's Germany and Nine-Eleven. Change Agents, such as community psychologists, psychiatrists, nurses, social workers and organizational development consultants; spiritual leaders; academicians; politicians; and CEOs of business organizations and banks may be particularly interested in reading this book. The only way to have peace is to listen to each other. If people are just trying to convince each other, there will be no peace.
