Registering The Driver. Once your driver has been implemented, you are ready to register it with the framework. To add additional drivers to Laravel's session backend, you may use the extend method on the Session facade.You should call the extend method from the boot method of a service provider.You may do this from the existing AppServiceProvider or create an entirely new provider:

HTTP Session - Laravel - The PHP Framework For Web Artisans

R is among the top tools for data mining and data science, due to its a highly powerful statistical and visualization capabilities, and very community which created many analytics-related packages. The new Try R Code School, sponsored by O'Reilly, lets you learn R at your own pace and earn badges for each chapter. Contents: R Syntax: A gentle introduction to R expressions, variables, and functions
