The Practical Guide to SAP GTS Part II dives into customs management and preference processing. Explore how to leverage self-filing, using a broker model, and adopting a free trade agreement to improve ROI. The book is current to version 10.1 and explores version 11.0 and its new features including Fiori apps and UX. - Best practices for leveraging SAP GTS for trade compliance - Fundamentals of preference implementation and system set up - How self-filing, broker models and free trade agreements can improve ROI - Review of Version 11.0 with screenshots

Many companies struggle with the ability to quickly and accurately create easy-to-read reports. This book systematically explains how you can leverage SAP Analysis Office (AO) to support your company's reporting needs. AO combines the experience users had with Business Explorer (BEx) reporting over the last decade, with the additional pivoting functionality offered by Microsoft, along with standard Excel reports. Combining these functionalities, SAP created a powerful tool for your daily analysis as you will discover in this book. Tight integration with the SAP NetWeaver BW environment ensures that reporting users can access and refresh data. This book dives into: - Installation and prerequisites - Key functionality and detailed explanations like Analysis Excel pivot, ribbon, and context menus - Enhanced reporting with API and Visual Basic (VBA) - A comparison of Business Explorer (BEx) and Analysis Office (AO) functionality

This book offers a comprehensive practical guide to SAP ABAP for ABAP professionals. Part I of this two-part series lays the groundwork with ABAP basics. Readers will learn fundamental methods and procedures for everyday ABAP use— for example, how to download files from SAP directories to workstations. Dive into the SAP Data Dictionary and how it works. Get detailed information on effective debugging techniques and how to use the SAP Debugger. Clarify when it is best to use standard SAP tables vs. Z-tables. Get expert developer tips and tricks including how to navigate ALV grid lists. Understand the documentation programs available to you and how to use them. Obtain useful reference lists of SAP transactions and SAP database tables. By using practical examples, tips, and screenshots, the author brings readers up to speed on the fundamentals of SAP ABAP. - How to get the most out of SAP ABAP - Guide for understanding and using the SAP Data Dictionary - Beginner and advanced debugging techniques - Expert ABAP development techniques

\* Detailed instructions on configuring SAP ERP Financials module \* Examples to clarify the tricky areas in a configuration \* Supported by screenshots to explain configuration of SAP financial module

Over the last few years, financial statement scandals, cases of fraud and corruption, data protection violations, and other legal violations have led to numerous liability cases, damages claims, and losses of reputation. As a reaction to these developments, several regulations have been issued: Corporate Governance, the Sarbanes-Oxley Act, IFRS, Basel II and III, Solvency II and BILMoG, to name just a few. In this book, compliance is understood as the process, mapped not only in an internal control system, that is intended to guarantee conformity with legal requirements but also with internal policies and enterprise objectives (in particular, efficiency and profitability). The current literature primarily confines itself to mapping controls in SAP ERP and auditing SAP systems. Maxim Chuprunov not only addresses this subject but extends the aim of internal controls from legal compliance to include efficiency and profitability and then well beyond, because a basic understanding of the processes involved in IT-supported compliance management processes are not delivered along with the software. Starting with the requirements for compliance (Part I), he not only answers compliance-relevant questions in the form of an audit guide for an SAP ERP system and in the form of risks and control descriptions (Part II), but also shows how to automate the compliance management process based on SAP GRC (Part III). He thus addresses the current need for solutions for implementing an integrated GRC system in an organization, especially focusing on the continuous control monitoring topics. Maxim Chuprunov mainly targets compliance experts, auditors, SAP project managers and consultants responsible for GRC products as readers for his book. They will find indispensable information for their daily work from the first to the last page. In addition, MBA, management information system students as well as senior managers like CIOs and CFOs will find a wealth of valuable information on compliance in the SAP ERP environment, on GRC in general and its implementation in particular.

This book offers a comprehensive introduction to SAP ERP Profit Center Accounting (PCA) for both classic general ledger (GL) and the new GL. Get the tools you need to set profitability targets for business (planning) and then compare actual results against those targets to improve overall profitability. Solidify your understanding of the difference between PCA and SAP Controlling Profitability Analysis (CO-PA) views. Gain in-depth knowledge of the concepts, objects, and functionality available in PCA in SAP ERP, including the relevant master data set-up, actual data flows, planning scenarios, and reporting options. Clarify the differences between PCA and CO-PA and understand when it is best to use each. Dive into profit center transfer pricing and obtain detailed configuration and set-up steps required for activation. By using practical examples, tips, and screenshots, the author brings readers up to speed on SAP Profit Center Accounting. - Fundamentals of SAP Profit Center Accounting (PCA) - Concepts, master data, actual data flow, and planning basics - Differences between PCA in classic and new GL - Reporting for Profit Center Accounting (PCA)
